

Shepherd University Board of Governors  
August 11, 2005  
Agenda Item No. 4

**UPDATE ON  
THE CENTER FOR CONTEMPORARY ARTS**

At the April 2005 meeting the Board approved the schematic designs for the Center for Contemporary Arts, the project budget, and the design and construction phases of the building.

As the project has progressed from schematic design to complete design phases, greater detail as to the visual form of the building is becoming available. At present, the design committee's recommendation is to have copper exterior walls and roofing.

Following is the artist's rendering of what the complete structure would look like after the color of the copper has turned to its ultimate shade of green.
