

Shepherd University Board of Governors
November 11, 2004
Agenda Item No. 6

IKENBERRY HALL ADDITION

The University staff and Bushey Feight architects have completed the schematic designs for the Ikenberry Hall Addition. The University is presently completing a new front entrance plaza which includes a permanent access ramp to the front entrance. The Ikenberry Addition will be built on the south end of the building, extending just short of the by-way adjoining the Byrd Center for Legislative Studies.

The central focus of the Ikenberry Addition is an elevator to service the three levels of Ikenberry Hall. Additional offices, conference room and restroom facilities will be included.

The Ikenberry Addition is estimated at about \$500,000 and will be paid for from existing capital reserves. Providing ADA-compliant access to enrollment services, the business office, and the President's Office has been a priority need for several years.

At the meeting, the complete schematics will be presented for approval.

The following resolution is recommended for adoption by the Board:

RESOLVED, That the Shepherd University Board of Governors approves the schematic designs for the Ikenberry Hall Addition.
