This is not the Noel-Levitz *Student Satisfaction Inventory* report. The HEPC's predecessor created these questions in 1996 and mandated that all graduating seniors be surveyed. The WVHEPC stopped collecting these data as of Spring 2001, but selected items continue to be used in assessments by various Shepherd constituencies so the survey has been continued.

** The 2022 year, for example, includes students who applied for graduation in August 2021, December 2021, or May 2022.

Responses were selected from a 5-point scale: 1 = Strongly Agree to 5 = Strongly Disagree. The closer to 1, the more positive is the response.

Note: Due to a transition from paper to electronic administration of this survey in 2019-20, only May 2020 graduates were surveyed, and the survey response rate was considerably lower. In 2020-21 and future years, all graduating seniors were surveyed electronically during the term prior to degree completion.
